

# ATLANTIC CARIBBEAN PACKAGING DOMINICAN REPUBLIC

## THE MOST TECHNICAL, SUSTAINABLE, AND COMPLETE PACKAGING COMPANY IN NORTH AMERICA AND THE CARIBBEAN

PHOTOS: ATLANTIC CARIBBEAN PACKAGING

Atlantic Caribbean Packaging Dominican Republic, is the most complete packaging company, with technical support and sustainability programs in North America and the Caribbean, ISO 9001 and FSC Certified, will soon be BRC certified.

Strategically located in the heart of the Caribbean, its geographical position gives it “Unique” abilities to provide service and support to all international manufacturing companies located in the Dominican Republic, exporting to the United States, Europe, the Caribbean, and other countries of the world. The Atlantic Caribbean Packaging plant is located 10 minutes away from the country’s main airport and one of the largest ports in the region, which interconnects with a global network of 60 countries on 5 continents.

In the 23 years that the company has been operating in the Dominican Republic, Atlantic has developed a customer base, which includes the main major manufacturing companies, as well as well-known brands worldwide ranging from Cigars, Medical Devices, Pharmaceuticals, Food Processing, Bottling, Electronic Equipments, Jewelry, Footwear, and Textiles, so it is a strategic supplier for all your customers and manufacturers.

In an exclusive interview with its Regional Director, Mrs. Yajaira Girón, she tells us, “Our operations “never” closed during such a critical time of the pandemic, due to the criticality and demand of our clients who had this important company to be able to comply with the supply chain and its demands, we are proud of this and the dedication of our team! Investors who plan to come to the Dominican Republic, evaluate us as an ally and strategic supplier for your packaging, equipment, and automation. Nearshoring is a “Phenomenon” that is very late-growing. Complicated supply chains, freight cost inflation, and geopolitical situations, are turning the Dominican Republic into a very attractive location for foreign investment.

We work closely with the government and its entities such as the National Council of Free Export Zones (CNZFE), the Dominican Association of Free Zones (ADOZONA), and international entities such as the World Free Zone Organization (WFZO), to offer a source of supply for packaging reliable and with high standards for all new investments that plan to come to the DR, or expand their current operations”, concludes Ms. Girón.
